

HARDWARE & SOFTWARE BREAKDOWN

MICROSOFT CERTIFICATIONS

Compatible with Windows 7

Windows is all about making your life easier. To make it easy, Microsoft recommends “Compatible with Windows 7” applications because they have passed Microsoft-designed tests to help ensure they install readily every time and minimise the number of crashes, hangs, and restarts you experience. This all helps ensure a compatible and reliable experience with any edition of Windows 7 including 64 bit.

The FlowCentric Process Suite has been tested to meet all of the technical requirements to be Compatible with Windows® 7.

Works With Server 2008 R2

FlowCentric Classic Navigator, FlowCentric Web 2.0, FlowCentric Event, FlowCentric Configuration Manager, FlowCentric Notification and Escalation Service have been tested to meet all of the technical requirements to become Works with Windows Server® 2008 R2 certified.

HARDWARE & SOFTWARE REQUIREMENTS

FlowCentric Process Suite (Administrator)

The following table shows the requirements for the FlowCentric Process Suite.

Hardware Requirements

Component	Recommended Requirements
CPU and Processor	2 GHz or higher
Memory	1GB of RAM
Hard disk	512MB of available hard disk space for a complete installation including all prerequisite software.
Display	Monitor set to 1280 x 1024 pixels or greater resolution
Network Card	100/1000 Mbps
Other	A compatible pointing device

Software Requirements

- One of the following operating systems:
 - Windows 7
 - Windows Vista with Service Pack 2
 - Windows XP with Service Pack 3
- Microsoft .NET Framework Version 3.5 Service Pack 1

If you intend to utilise Visio as your default modeller the following software components are required in addition to the requirements listed above:

- One of the following versions:
 - Microsoft Visio 2010 x86 (32bit)
 - Microsoft Visio 2007
 - Microsoft Visio 2003

FlowCentric Navigators: Classic / Web 2.0 (End User)

The following table shows the requirements for the FlowCentric Classic/Web 2.0 Navigator.

Hardware Requirements

Component	Recommended Requirement
CPU and Processor	1 GHz or higher
Memory	512 MB of RAM
Display	Monitor set to 1280 x 1024 pixels or greater resolution
Network Card	100/1000 Mbps
Other	A compatible pointing device

Software Requirements

- One of the following operating systems:
 - Windows 7
 - Windows Vista with Service Pack 2
 - Windows XP with Service Pack 3
- One of the following browsers:
 - Microsoft Internet Explorer 6+
 - Mozilla Firefox 3.0.4 +
 - Safari 3.2.1 +
 - Google Chrome
 - Opera 9+

Note: Although our product runs and is tested on browsers running within other host operating systems, FlowCentric Processware is not officially supported on non-Microsoft platforms such as Mac OS and Linux.

FlowCentric Activity Server (Web Server)

The following table shows the requirements for the FlowCentric Activity Server. In a production environment, the volume of traffic may dictate greater hardware requirements for your servers.

Hardware Requirements

Component	Recommended Requirements
CPU and Processor	2.0 GHz or higher
Memory	4 GB of RAM
Hard disk	2 GB of available hard disk space for a complete installation including all prerequisite software.
Network Card	100/1000 Mbps
Other	A compatible pointing device

Note: If you are planning to utilise a local file share for storing the file uploads please factor the hard disk space into the requirements.

Software Requirements

- One of the following operating systems:
 - Windows Server 2008 R2
 - Windows Server 2008 with Service Pack 2
 - Windows Server 2003 R2, or
 - Windows Server 2003 with Service Pack 2
- Microsoft Internet Information Services (IIS) 6.0+ (32-bit Application Pool required)
- Microsoft .NET Framework Version 3.5 Service Pack 1

Note: It is recommended to use separate servers for the FlowCentric Database and the FlowCentric Web Application.

FlowCentric Database Server

The following table shows the requirements for the FlowCentric Database Server Requirements. In a production environment, the volume of traffic may dictate greater hardware requirements for your servers.

Hardware Requirements

Component	Recommended Requirements
Computer and Processor	2.0 GHz or higher
Memory	2 GB of RAM or more
Hard disk	20 GB of available hard disk space
Network Card	100/1000 Mbps
Other	A compatible pointing device

Note: Additional available hard-disk space will be required as the application gets used. This growth by use will need to be factored into the hard drive size choice.

Software Requirements

- One of the following operating systems:
 - Windows Server 2008 R2
 - Windows Server 2008 with Service Pack 2
 - Windows Server 2003 R2, or
 - Windows Server 2003 with Service Pack 2
- One of the following database applications:
 - SQL Server 2008 R2
 - SQL Server 2008 with Service Pack 1
 - SQL Server 2005 with Service Pack 3

Note: It is recommended to use separate servers for the FlowCentric Database and the FlowCentric Web Application.
